Alt + Shift + R	Reading Mode kholo
F12 / Ctrl + Shift + J	Developer Tools
Ctrl + Shift + I	Developer Tools (Inspect)
Ctrl + Shift + C	Element inspect mode
F1	Chrome Help Center naye tab mein

*Note: Windows par Settings kholne ka koi direct shortcut nahi hai — **Alt + F** phir **S** dabao, ya address bar mein **chrome://settings** type karo. Mac par **⌘ + ,** chalta hai.*

PART 2 — SETTINGS (chrome://settings)

Address bar mein **chrome://settings** likho. Har section ka apna direct URL bhi hai (neeche diya gaya hai).

1. You and Google — **chrome://settings/people**

- **Sync and Google services** — history, bookmarks, passwords, extensions sab devices par sync.
- **Manage your Google Account** — security, 2-Step Verification, My Activity delete karna.
- **Import bookmarks and settings** — Firefox/Edge se data laao.

2. Autofill and passwords — **chrome://settings/autofill**

- **Password Manager** — saved passwords, **Checkup** tab (leak hue password batata hai), passkeys, Windows Hello se protect karna.
- **Payment methods** — cards save karo.
- **Addresses and more** — address autofill.
- **Enhanced autofill** — chaaho to OFF rakho.

3. Privacy and security — **chrome://settings/privacy**

- **Safety Check** — ek click mein sab kuch scan.
- **Delete browsing data** — history, cookies, cache, passwords clear.
- **Third-party cookies** — "Block third-party cookies" chunna sabse privacy-friendly.
- **Cookies and other site data** — allow/block lists manage karo.
- **Security** — Standard protection ya **Enhanced protection** (URLs Google ko bhejta hai, par zyada safe).
- **Ad privacy** — Topics, Ad measurement, Ad personalization ko OFF kar sakte ho.
- **Site settings** — har site ke liye location, camera, mic, **notifications**, pop-ups, clipboard, sensors ka control. Notification spam hamesha ke liye yahan se band karo.

4. Performance — **chrome://settings/performance**

- **Memory Saver** — inactive tabs ki RAM free karta hai. Modes: Moderate / Balanced / Maximum + site exceptions.
- **Energy Saver** — laptop battery bachata hai.
- **Preload pages** (Speed section) — "Extended preloading" ON = pages jaldi khulte hain, thoda data/RAM zyada lagta hai.

5. Appearance — **chrome://settings/appearance**

- **Theme** — Chrome Web Store se custom theme.
- **Customize Chrome** — new tab page ka background, colour, shortcuts.
- **Show Bookmarks bar** — **Ctrl + Shift + B**
- **Show Home button** — isme apna custom URL daal sakte ho.
- **Font size** — Very small se Very large; "Customize fonts" mein exact size + default page zoom.

6. Search engine — **chrome://settings/search**

- Default search engine badlo (Google, Bing, DuckDuckGo, YouTube...).
- **Manage search engines and site search** — yahan se custom keyword banao: jaise **yt** type karke **Tab** dabao to seedha YouTube search.

7. On startup — **chrome://settings/onStartup**

- New Tab page / **Continue where you left off** (sabse useful) / Specific pages kholo.

8. Downloads — **chrome://settings/downloads**

- Download location change.

- "Ask where to save each file before downloading" — ON kar lo.
- Automatic downloads ki allow/block list.

9. Languages — <chrome://settings/languages>

- Spell check, auto-translate, preferred language order, Chrome ka interface language.

10. Accessibility — <chrome://settings/accessibility>

- Screen reader support, "Highlight text cursor", **Live Caption** (video ke live captions).

11. System — <chrome://settings/system>

- **Hardware acceleration** — graphics card use karo (video stutter ho to OFF karke dekho).
- **On-device AI** — Chrome local AI models download karta hai; data bachana ho to OFF.
- Chrome band hone ke baad background apps chalte rahein — yahan se.
- Chrome ka built-in Task Manager kholo.

12. Extensions — <chrome://extensions>

- Installed extensions manage karo; **Developer mode** ON karke unpacked extension load karo.
- Har extension ka **Site access** — "On click" sabse safe.
- <chrome://extensions/shortcuts> — har extension ka apna keyboard shortcut banao (bahut kaam ki cheez).

13. AI innovations — <chrome://settings/ai>

- Gemini in Chrome, page content sharing, Tab organizer, History search, Compose, Page summarizer — jo nahi chahiye OFF karo.

14. About Chrome — <chrome://settings/help>

- Version dekho aur **Update** karo.
- Sab kuch default par laana ho: <chrome://settings/reset> (bookmarks aur extensions safe rehte hain).

PART 3 — SECRET <chrome://> PAGES

Address bar mein ye type karo:

Page	Kya milega
chrome://settings	Poori settings
chrome://help/shortcuts	Official keyboard shortcut list
chrome://flags	Experimental features — dher saare hidden options (dhyaan se use karo)
chrome://version	Version, profile path, command-line flags
chrome://gpu	Graphics / hardware acceleration ki detail
chrome://net-internals	Network debugging, DNS cache flush
chrome://crashes	Crash reports
chrome://system	System + per-process detail
chrome://extensions	Extensions
chrome://extensions/shortcuts	Extensions ke custom shortcuts
chrome://bookmarks	Bookmark manager
chrome://history	History

Page	Kya milega
chrome://downloads	Downloads
chrome://apps	Installed web apps (PWA)
chrome://profile-picker	Multiple profile manage karo
chrome://new-tab-page	Naya tab
chrome://media-internals	Video/audio playback debug
chrome://policy	Company/school policies
chrome://about	Saare available chrome:// URLs ki list
about:blank	Bilkul khaali page

PART 4 — PRO TIPS (jo log kam jaante hain)

1. **Tab pin karo** — tab par right-click → "Pin". Chhota ho jaata hai aur hamesha rehta hai.
2. **Tab groups** — tab par right-click → "Add tab to new group". Colour + naam do, ek click mein poora group collapse.
3. **Vertical tabs** (naya) — window ke top par right-click → "Show Tabs Vertically". Zyada tabs ke liye best.
4. **Site ko App banao** — 3-dot menu → Cast, save and share → **Install page as app**. Desktop icon, alag window, bina address bar.
5. **Reading Mode** — page par right-click → "Open in reading mode", ya **Alt + Shift + R**. Full-screen ya side panel, font/colour badalna, aur text ko bolkar sunna bhi.
6. **Split view** — **Shift + Alt + N** se active tab mein split screen.
7. **Khule tabs dhoondhna** — address bar mein tab ka title type karo; result ke neeche "Switch to this tab" aayega.
8. **Multiple profiles** — top-right avatar se alag Google account/profile (office + personal).
9. **Password checkup** — **chrome://settings/passwordCheckup** — leak hue passwords turant pata chalte hain.
10. **Chrome Task Manager** (**Shift + Esc**) — RAM khaane wala tab pakdo aur end karo.
11. **Ctrl + Shift + T** sabse life-saving shortcut hai — galti se band hua tab wapas.
12. **Incognito** mein extensions default OFF rehte hain — **chrome://extensions** → extension ki details → "Allow in Incognito" ON karo.
13. **Extension ka apna shortcut** — **chrome://extensions/shortcuts** (jaise "copy page URL" ke liye hotkey).
14. **Chrome reset** — **chrome://settings/reset**.

PART 5 — SPEED UP CHECKLIST

- Extensions kam rakho (har extension RAM khaata hai) — **chrome://extensions**.
- **Memory Saver** ON + Balanced mode (**chrome://settings/performance**).
- **Energy Saver** ON (laptop par).
- Preload pages → Extended preloading (fast loading, thoda extra data).
- Hardware acceleration ON (**chrome://settings/system**); video stutter ho to OFF karke test karo.
- Time-time par **Ctrl + Shift + Delete** → "Cached images and files" clear.
- **chrome://flags** ke experimental flags ko default par rakho — galat flag browser crash kara sakta hai.
- Tab groups + Memory Saver se 30+ tabs bhi smoothly chalte hain.

*Shortcuts Google ki official Chrome help page se verify kiye gaye hain
